FEATURES AND BENEFITS

Wireless transmitter

So you want the ultimate in gate safety, but don't necessarily want to ruin your beautiful cobblestone driveway to get it. No problem! The **Photon** makes use of a completely wireless transmitter, allowing you to leave tunnelling and burrowing to the moles and saving you precious time and money.

Low power consumption

The wireless transmitter beam requires only two AA batteries (included in the kit) to deliver minimum two years of reliable operation. Low current-draw throughout the system means greater efficiency and a longer battery life, so you'll have reliable automated gate safety for years to come.

Fully weatherproof enclosure

Mother Nature is a fickle dame, that much is true, but luckily **Photon's** fully weatherproof enclosure ensures that the electronics will never bear the brunt of her outbursts.

Long-distance performer

'No limits' is the maxim by which we engineered our semi-wireless safety beams and, with a 30 metre operating range, **Photon** is ideal for almost any entrance gate.

Compatible with Intruder-detection Alarms

Safety and security has always gone hand in hand, and **Photon** further enhances this happy union via full compatibility with the Intruder-detection Alarms (a world first) found on certain CENTURION operators.

Easy on the eye

Who says safe can't be sexy? **Photon** is only 50mm wide, making it unobtrusive and aesthetically pleasing. With sleek curves and attractive slim-line construction, these CENTURION beams are sure to enhance the aesthetics of any entrance lucky enough to be protected by them.
